

Well Control & Blowout Prevention Masterclass

Oil & Gas Operations

QGT-OGP-182 | Masterclass | 5 or 10 days | Online, classroom, in-house

Course overview

Well Control & Blowout Prevention Masterclass is a senior-level masterclass on strategy and performance in Well Control & Blowout Prevention. It covers the principles, the requirements of API, IOGP, ISO 13702 and company standards, and the practical methods used on site, with case studies from operations in the Gulf, Africa and worldwide. Available online, in the classroom in 60 cities, or in-house.

What participants will be able to do

- Explain the principles, terminology and scope of Well Control & Blowout Prevention
- Apply the relevant requirements of API, IOGP, ISO 13702 and company standards
- Use practical tools, checklists and calculations with confidence
- Recognise common problems, risks and root causes and choose the right corrective action
- Build a business case and roadmap their leadership team can act on

Who should attend

Designed for operations, production and process staff in upstream, midstream and downstream oil and gas in senior and leadership roles.

Course outline (5 days)
